## SUMMARY :

Strong knowledge of building web applications with Redux state management, REST APIs, handling user authentication & authorization, and also following the best practices to write reusable components.

## SKILLS:

**Programming Languages**: JavaScript ( ES5, ES6 )

**Front-End Technologies**: HTML, CSS, React, Redux, Bootstrap, Material UI

**Relevant Skills**: AJAX, API, Git, GitHub, JWT, JSON, Redux, LocalStorage

**Tools**: VS Code, Postman

## PROJECTS:

**Edu E-Learning App (Ongoing Project)**
https://github.com/sriramanamaiya/EDU-E-LEARNING-APP

An E-learning app where the admin can register with academy details and login into his account. Admin can add courses, register students, allow the students to log in to the website, also update, delete the students. Students can log in to their accounts for accessing the course.

- Completed Admin authentication and registering students ( CRUD Operation ) till now.

Packages: Redux**,** Redux Thunk, React-Redux, React Router Dom, Axios, Material UI, Formik & Yup.

**My Notes App**
https://github.com/sriramanamaiya/USER-AUTH-AND-MY-NOTES-APP

A Simple note-taking app where the new user will be able to register and then log into the account. Account information of the authenticated users will be shown on the account page and on the notes page, the user can add, update, edit, delete and view favorite notes.

- Used Formik to build forms and for validation used Yup.

- Particular notes and captions are shown in the modal using Material UI.

Packages: Redux**,** Redux Thunk, React-Redux, React Router Dom, Axios, Material UI, Formik & Yup.

**User Job Application App**
https://github.com/sriramanamaiya/USER-JOB-APPLICATION-APP

A User Job Application app, where Job applicants can apply for jobs and the employer can review the job application and he can shortlist or reject the application.

- Form validations are handled to ensure that the user has not given any invalid inputs.

- Applicant's data is shown in table format and the Employer can view the particular applicant details in the modal.

- Used Bootstrap and React Bootstrap for styling and also for displaying details in modal format.

Packages: Axios, Bootstrap, React Bootstrap, React-Router-Dom, Validator.

## EXPERIENCE:

**Trainee Software Intern:**                                                    7/2021 to Present

**DCT Academy, Bengaluru**

- Learnt Basics to advanced concepts of JavaScript.

- Hands-on experience in building User Interfaces using React JS, Redux

## EDUCATION:

Srinivas School of Engineering, Mangalore

Bachelor of Engineering in Mechanical Engineering
August 2014 - June 2018
63.52%

## CERTIFICATION:

Post Graduate Certifcation in Front End Development, DCT Academy 2021

## CO-CURRICULAR ACTIVITIES:

- Built a Blogspot website on Custom Rom & Themes for Galaxy Mobile in PU.
- Conducted various activities during the technical fest.

## PERSONAL DETAILS:

Languages: English, Kannada

Hobbies: Cooking, Playing Cricket & Badminton
